I. Executive Summary

An orchestration layer for the Indian wedding ecosystem.

— Executive Overview

An Indian wedding is rarely one event and never one vendor. A single celebration can involve a venue, a caterer, decorators, photographers, hotels, transport, entertainers, makeup artists, invitations, gifting and a guest list of hundreds, each sourced, negotiated, paid and managed separately by the family. Digital technology has reshaped banking, shopping and travel; the wedding, one of the largest and most emotional purchases a family makes, is still assembled from fragmented, disconnected providers.

BRIDLYA was conceived to change that. It is a coordinated wedding platform that brings the people, places, experiences and details of a celebration into one carefully orchestrated journey: **discovery, curation, planning, booking, coordination, hospitality, logistics, execution and support**. BRIDLYA works *with* independent businesses rather than replacing them. Families get one coordinated experience and one team to call; partners gain access to qualified wedding demand and a structured way to deliver it.

BRIDLYA is not a vendor directory and not a single planner. It is positioned as an **orchestration layer**: technology organises the celebration, and a human coordination team makes sure it happens beautifully.

The BRIDLYA operating stack: four layers working as one

INVESTOR INSIGHT

BRIDLYA monetises coordination, not just introductions. Because the same relationship spans planning, booking, logistics and on-ground delivery, every wedding generates several revenue lines, while partners and families gain reasons to return.

— Key Highlights

- One coordinated experience for a family; one structured demand channel for independent wedding businesses.
- Addresses a very large, highly fragmented, largely unorganised market (published estimates: 10 million+ weddings a year).
- Platform economics: coordination fees and partner commissions, partner subscriptions, and adjacent services.
- Brand and product vision already expressed in a working, production-quality website prototype.
- Expansion path from weddings into travel, gifting, hospitality, anniversaries and private events.

Stage and honesty note. BRIDLYA is a pre-launch concept. The website prototype is built; no customers, partners or revenue exist yet. All market figures are third-party estimates and all financial projections are illustrative scenarios built on stated assumptions (Appendix A).

2. Why This Matters

The challenge is not a lack of providers. It is a lack of connection.

India has no shortage of beautiful venues, gifted caterers, skilled decorators or talented photographers. What it lacks is a dependable way to bring them together around one family's wedding. The family becomes the project manager of a multi-day, multi-vendor production at the most emotionally charged moment of their lives.

— Challenges Across the Ecosystem

Families

- Dozens of separate conversations, quotes and payments.
- No single view of budget, timeline or responsibilities.
- Guest logistics (stays, transfers, itineraries) handled by relatives.
- Weeks of the wedding spent chasing vendors instead of celebrating.

Independent Vendors

- Demand depends on referrals and walk-ins.
- Quotes, bookings and payments run through chats and calls.
- Limited tools to present work professionally or manage calendars.
- Cash-flow and scope disputes with little documentation.

Venues & Hotels

- Fragmented inbound enquiries of uneven quality.
- Coordination with outside vendors is manual.
- Guest-room blocks and event timings managed separately.

Planners

- Premium planners deliver superbly but are bespoke and hard to scale.
- Pricing and availability limit them to a narrow segment.
- Little shared infrastructure across vendors and events.

INVESTOR INSIGHT

The infrastructure already exists. Venues, kitchens, florists, drivers and musicians are all there. The opportunity is to connect and orchestrate them, making existing capacity more discoverable, reliable and efficient, rather than building new supply.

3. The Opportunity

A very large market that is still organised mostly by word of mouth.

— Market Size

Published industry estimates describe the Indian wedding sector as one of the largest consumer categories in the country. They vary by definition (core wedding services versus all wedding-linked spend, including jewellery and apparel), so BRIDLYA treats them as a range, not a point.

INDICATOR	PUBLISHED ESTIMATE	NOTE
Weddings per year	10 million+	Widely cited across industry reports
Wedding industry value	≈ ₹4.25 lakh crore (≈ US\$51 bn) to ≈ ₹6.5 lakh crore	Definitions differ; broader estimates cited above US\$100 bn
Organised share of wedding spend	≈ 13% (2024)	Indicates most of the market is still unorganised
Vendor bookings made online	≈ 24%	Online discovery is established; coordination is not
Wedding-linked livelihoods	25 million+	Supply side is vast and largely informal

Sources: IBEF (Examining the Economic Impact of India's Wedding Industry); Ken Research (India Wedding Market); IMARC Group (India Wedding Services Market). Figures are secondary estimates gathered in October 2026 and should be independently verified before external circulation.

— How BRIDLYA Sizes Its Opportunity

Total, serviceable and obtainable market, with assumptions flagged

The serviceable market is deliberately narrow. BRIDLYA begins with premium and large-format weddings, where coordination pain is greatest, budgets support a managed experience, and referral value is highest. The **1.5% of weddings (about 150,000 a year)** and **₹25 lakh average spend** used here are working assumptions to be replaced by primary research in the launch city.

— Why Now?

Digital Payments

UPI and digital invoicing make structured, traceable booking normal for vendors and families alike.

Online-First Discovery

Couples already search, shortlist and compare online; they now expect to complete the journey there.

Rising Experience Spend

Families are investing in multi-day, destination and guest-centred celebrations that are harder to run manually.

Vendor Digitisation

Small businesses increasingly want affordable tools to show their work, manage enquiries and get paid.

Diaspora & Destination

Overseas families and destination weddings need remote, reliable, single-team coordination.

Operational Know-How

Hospitality-style run-sheets and logistics can now be shared across vendors on one platform.

INVESTOR INSIGHT

Roughly four in five wedding rupees are still spent outside organised channels. The prize is not displacing established brands; it is bringing unorganised, referral-driven supply and demand onto a trusted, structured platform.

4. Meet BRIDLYA

Where Forever Begins. Every detail, beautifully brought together.

BRIDLYA's brand is built on a simple belief: *a wedding is not a day; it is a thousand little moments, brought together into one memory.* The platform exists to protect those moments by taking care of everything around them.

For Families

- One team, one plan, one place to ask.
- Budget, timeline and vendor visibility.
- Guest logistics: stays, transfers, itineraries.
- Tradition-aware planning for any community.
- Support before and during the celebration.

For Partners

- Qualified wedding demand.
- Structured quotes, agreements and bookings.
- A professional portfolio and presence.
- Relevant opportunities matched to craft and calendar.
- Clear scope, payment and communication.

For Venues & Hotels

- Pre-qualified, well-briefed events.
- Room-block and guest-flow coordination.
- One accountable team for outside vendors.

For Guests

- Clear itineraries and RSVPs.
- Arrival, transfer and stay support.
- A concierge line that is answered.

— Brand Identity

BRIDLYA's visual language sits between a luxury fashion house, a premium hospitality group and a modern technology company: ceremonial vermilion, warm ivory and restrained champagne, set in editorial typography. The brand deliberately avoids the ornate clichés of wedding portals, signalling confidence, calm and operational seriousness, qualities that matter when a family is entrusting its most important event.

INVESTOR INSIGHT

Brand is a commercial asset here. Premium weddings are bought on trust and taste; a distinctive, credible identity lowers acquisition cost and supports premium positioning from day one.

5. The BRIDLYA Ecosystem

Many specialists. One experience.

One family at the centre of fourteen categories of independent specialists

— How the Ecosystem Works

Families

Describe their vision, traditions and budget.
Receive curated options, a single plan and one coordinating team.

BRIDLYA Team

Curates, structures agreements, briefs vendors, runs logistics and supports the family through the celebration.

Partners

Register, submit business information, define services and locations, receive matched opportunities and manage bookings.

Platform

Holds the plan, bookings, payments and communication in one record, and learns which pairings and processes work.

— Network Effects

- **Supply improves demand:** a deeper, verified partner network gives families better, faster shortlists.
- **Demand improves supply:** consistent, qualified bookings attract better partners and keep them engaged.
- **Data compounds:** repeat coordination yields run-sheets, benchmarks and quality signals that are hard to copy.
- **Cross-sell is built in:** one relationship covers venue, catering, travel, gifting and honeymoon.

6. Experience & Product Walkthrough

A cinematic brand website today; an operating platform tomorrow.

The first product milestone is complete: a production-quality brand website that tells the BRIDLYA story as a scroll-driven journey through a wedding, from the first venue conversation to the final farewell. It already communicates the concept, the end-to-end service, the partner proposition and the operating principles. It is designed to evolve into the customer and partner platforms.

Opening: silk curtains part to reveal the BRIDLYA wordmark

Wedding chapters: venue, table, celebration, journey

The ecosystem connecting around the family

End-to-end timeline, Vision to Farewell

Illustrative day-of operations for a sample wedding

Partner proposition: "Your craft. More celebrations."

Imagery on the prototype is illustrative artwork; the site is built so real photography can be dropped in without code changes. Names and scenarios shown (for example "Ananya & Arjun") are fictional.

Platform Modules (Planned)

MODULE	PURPOSE	STATUS
Brand website	Story, positioning, enquiry capture	Built (prototype)
Family planning space	Vision, shortlist, budget, timeline, guest management	Planned, Phase 1–2
Partner portal	Registration, business verification, services, portfolio, bookings	Planned, Phase 1–2
Coordination console	Run-sheets, vendor briefs, task and escalation tracking	Planned, Phase 2
Guest experience	Invitations, RSVPs, itineraries, transfers, concierge	Planned, Phase 2–3
Payments & agreements	Quotations, e-agreements, milestones, settlements	Planned, Phase 2
Admin & analytics	Quality tracking, finance, partner performance	Planned, Phase 2–3

7. The End-to-End Operating Model

Technology organises the celebration. People make sure it happens beautifully.

Ten stages from first idea to farewell, with a single coordinating team throughout

— The Human Coordination Layer

BRIDLYA's defensibility is as much operational as technical. Every wedding is supported by a small, named team:

ROLE	RESPONSIBILITY
Wedding Manager	Single point of coordination from first conversation to farewell
Family Concierge	Looks after elders, rituals and the many small unwritten requests
Vendor Coordinator	Briefs, aligns and follows up with every partner
Guest Experience Manager	Invitations, RSVPs, itineraries and the guest line
Hospitality Coordinator	Rooms, meals, welcome kits and host details
Event Production Team	Builds, lights, runs and resets spaces
On-Ground Support	Present at venues, hotels and pickup points to solve issues early

— Illustrative Operational Day

The website walks through a fictional wedding hour by hour (guest arrivals at 06:30, ceremony at 17:00, guest return at 01:00, farewell the next morning) to show investors what coordination looks like in practice: shuttles on fixed rotations, kitchens briefed on dietary notes, run-sheets naming who does what and when.

INVESTOR INSIGHT

Operational playbooks (run-sheets, vendor briefs, escalation paths) become reusable assets. Each wedding makes the next one cheaper and more reliable to deliver, which is how a service business becomes a scalable platform.

8. Built for India's Many Weddings

No two families celebrate the same way.

Indian weddings vary enormously by region, community, religion and generation. BRIDLYA is designed to adapt the experience around the family, not the other way around. The platform treats traditions as *planning inputs* (timings, rituals, menus, attire, guest flows), not as templates.

CELEBRATION STYLE (EXAMPLES, NOT AN EXHAUSTIVE LIST)	WHAT PLANNING MUST RESPECT
South Indian temple wedding	Early muhurtham, temple schedules, fixed ritual order
Tamil wedding	Leaf-served feasts, nadaswaram, ceremonies timed to the hour
Kerala wedding	Quiet silk, morning ceremony, sadya as part of the ritual
North Indian wedding	Multi-day events: haldi, mehendi, sangeet, pheras, baraat
Punjabi wedding	Baraat arrival, sangeet energy, large dance-floor events
Bengali wedding	Alpona, conch shells, a distinct ritual vocabulary
Christian wedding	Church ceremony plus a reception with family traditions
Destination wedding	Guest travel, stays, itineraries, weather contingencies
Contemporary intimate wedding	Small guest list, design-led, minimal formality
Grand multi-day celebration	Many events, venues and generations on one timeline

— Built on Trust

- **Tradition-aware:** rituals and timings come first; vendors are briefed accordingly.
- **Vendor-friendly:** simple onboarding, UPI-first payments, clear terms for small businesses.
- **Family-first:** one conversation, one record, one accountable team.
- **Ready to scale:** regional adaptability is a configuration of the platform, not a rebuild.

9. Competitive Landscape & Differentiation

A gap between wide directories and deep, bespoke planners.

Conceptual positioning (qualitative, not based on measured data)

CATEGORY	TYPICAL STRENGTH	TYPICAL LIMITATION	BRIDLYA'S POSITION
Wedding directories & marketplaces (e.g. WedMeGood)	Breadth of listings; discovery; inspiration	Discovery rather than end-to-end delivery	Uses breadth as supply; adds curation, booking and coordination
Premium full-service planners (e.g. Aprille, Bon Evento)	Deep, bespoke, hospitality-grade execution	Limited scale; high price; capacity-constrained	Aims for planner-grade coordination, systemised and repeatable
Individual vendors	Craft and local relationships	Fragmented demand; manual operations	Partner, not competitor: brings demand and tools

CATEGORY	TYPICAL STRENGTH	TYPICAL LIMITATION	BRIDLYA'S POSITION
Hotels & venues	Controlled environment; in-house teams	Narrow scope; locked to property	Orchestrates venues alongside every other category

Companies named are cited only as examples of existing categories and as inspiration for breadth and end-to-end positioning; BRIDLYA has no relationship with them and makes no claims about their performance.

— Sources of Advantage

- **Orchestration, not listings:** coordination is where value, loyalty and margin sit.
- **Operational playbooks:** reusable run-sheets and escalation paths compound with every event.
- **Two-sided trust:** verified partners and transparent agreements reassure both sides.
- **Brand:** premium, calm and distinctive in a visually crowded category.
- **Partner-friendly model:** working *with* independent businesses eases supply onboarding.

INVESTOR INSIGHT

Incumbents can copy a feature; they cannot easily copy accumulated operating discipline, a verified partner graph and the trust of families who have had one team handle everything.

10. Business Model & Unit Economics

Multiple revenue streams on a single customer relationship.

— Revenue Streams

STREAM	HOW IT EARNS	NATURE
1. Coordination & commission	Planning/coordination fee and a commission on partner bookings made through BRIDLYA (blended take rate)	Transactional, scales with GMV
2. Partner subscriptions ("BRIDLYA Pro")	Analytics, priority visibility, calendar and booking tools for partners	Recurring
3. Guest, travel & gifting services	Room blocks, transfers, invitations, hampers, honeymoon and travel	Attach revenue per wedding
4. Enterprise & destination	Corporate celebrations, hotel/venue programmes, destination packages	Contract-based

STREAM	HOW IT EARNS	NATURE
5. Future services	Insurance and financing referrals, hospitality, private events, anniversaries	Lifetime-value expansion

— Illustrative Unit Economics (Base Case, per Wedding)

LINE	ASSUMPTION	₹ PER WEDDING
Average wedding spend coordinated (GMV)	₹25 lakh	25,00,000
Blended take rate	8% of GMV	2,00,000
Other services (travel, gifting, guest services)	1% of GMV	25,000
Revenue per wedding		2,25,000
Cost to serve (manager, on-ground team, support)	≈ 3.5% of GMV	(87,500)
Contribution per wedding	≈ 5.5% of GMV (≈ 61% of revenue)	1,37,500
Customer acquisition cost	Assumed ₹40,000 (referrals, partners, digital)	(40,000)
Contribution after acquisition	Payback on the first wedding	97,500

All figures in this table are management assumptions for illustration. Actual take rates, costs and acquisition spend will be established in pilot weddings.

INVESTOR INSIGHT

Weddings are high-ticket, low-frequency purchases, but each one carries 50–100+ vendor transactions and hundreds of guest touchpoints. BRIDLYA monetises the breadth of a single wedding, then extends its relationship to travel, anniversaries and family events.

II. Market Share & Financial Scenarios

Illustrative five-year scenarios built on explicit assumptions.

The scenarios below translate the market sizing into weddings coordinated, gross booking value (GMV) and revenue. **They are illustrative, not forecasts**; every input is listed in Appendix A so investors can stress-test or replace it.

— Base Case Summary

	YEAR 1	YEAR 2	YEAR 3	YEAR 4	YEAR 5
Weddings coordinated	20	150	600	1,800	4,000
GMV coordinated (₹ cr)	5.0	37.5	150.0	450.0	1,000.0
Commission & coordination (₹ cr)	0.4	3.0	12.0	36.0	80.0
Partner subscriptions (₹ cr)	0.1	0.4	1.3	2.9	5.4
Other services (₹ cr)	0.1	0.4	1.5	4.5	10.0
Total revenue (₹ cr)	0.5	3.7	14.8	43.4	95.4
Share of serviceable weddings	0.01%	0.10%	0.40%	1.20%	2.67%
Share of all Indian weddings	0.000%	0.002%	0.006%	0.018%	0.040%
GMV as share of ₹4.25 lakh cr market	0.00%	0.01%	0.04%	0.11%	0.24%

Base-case revenue by stream, ₹ crore

— Scenario Range

YEAR 5 OUTCOME	CONSERVATIVE	BASE	AMBITIOUS
Weddings coordinated	1,000	4,000	12,000
Average wedding spend	₹20 lakh	₹25 lakh	₹30 lakh
Blended take rate	6%	8%	10%
GMV coordinated	₹200 cr	₹1,000 cr	₹3,600 cr
Total revenue	₹14.8 cr	₹95.4 cr	₹428.4 cr
Share of serviceable weddings (150,000)	0.7%	2.7%	8.0%
Share of all Indian weddings	0.01%	0.04%	0.12%

— Sensitivity: Year 5 Revenue (₹ crore)

WEDDINGS COORDINATED ↓ / TAKE RATE →	6%	8%	10%
1,000	15	20	25
2,000	30	40	50
4,000	60	80	100
6,000	90	120	150
8,000	120	160	200

Sensitivity holds average wedding spend at ₹25 lakh and excludes subscription and other-services revenue.

INVESTOR INSIGHT

Even the base case implies roughly 2.7% of the serviceable market and about 0.04% of all weddings in India by Year 5. The thesis does not require dominating the market. It requires executing excellently in a premium niche of a very large one.

12. Go-to-Market Strategy

Concentrate, prove, then replicate.

— Launch Approach

- **One launch city first.** Build supply density where coordination pain and willingness to pay are high (the website uses Chennai as an illustrative example; the city is to be decided).
- **Supply before demand.** Seed a curated partner network across the core categories, with verification built into onboarding.
- **Pilot weddings.** Deliver a small number of fully managed weddings to refine run-sheets, pricing and cost-to-serve.
- **Case-study-led growth.** Each delivered wedding becomes content, referrals and partner proof.

— Acquisition Channels

CHANNEL	ROLE
Family referrals & community networks	Highest-trust source for premium weddings
Venue, hotel and planner partnerships	Qualified inbound enquiries and co-selling
Brand and content (editorial website, social)	Builds taste, trust and organic demand
Destination and diaspora weddings	Remote families who most need single-team coordination
Corporate and enterprise programmes	Repeat, contract-based demand

— Partner Acquisition

Partners are recruited through personal outreach, venue and planner introductions and an open application process. Value proposition: access to qualified demand, structured bookings and a professional presence. Onboarding collects business and legal information, services, locations and portfolio, with verification before partners are shown to families.

INVESTOR INSIGHT

A wedding is a seasonal, concentrated purchase. Operating a single launch city lets BRIDLYA manage peaks with a compact team, learn quickly, and build a repeatable playbook before expanding.

13. Trust, Operations & Risk Management

Beautiful weddings need serious operations behind them.

BRIDLYA's principles are set out publicly on its website. They are design commitments being built into the platform, not certifications held today.

PRINCIPLE	INTENT
Verified business information	Partners submit legal and business details before being presented to families
Clear agreements, transparent scope, defined cancellation terms	Written terms on what is included, who is responsible and what happens on cancellation
Structured bookings and documented responsibilities	Run-sheets that name who does what, and when
Performance tracking and quality monitoring	Delivery, punctuality and feedback recorded across weddings
Support, escalation, secure payments and clear communication	A named team, a defined escalation path, protected payment channels and one thread of record

— Key Risks and Mitigations

RISK	WHY IT MATTERS	MITIGATION
Seasonality	Weddings cluster in auspicious periods	Compact core team, flexible on-ground staffing, ancillary and off-season revenue (travel, anniversaries, corporate)
Service quality at scale	One failed event damages trust	Pilot-first rollout, run-sheet discipline, partner scoring, escalation protocol
Disintermediation	Families and vendors may transact directly after introduction	Value in coordination, payments, accountability and guest logistics, not introductions alone

RISK	WHY IT MATTERS	MITIGATION
Liability and disputes	Multi-party agreements carry legal exposure	Clear contracts, defined scope, appropriate insurance and legal review
Payments & regulation	Handling funds can trigger compliance requirements	Work with licensed payment partners; seek legal advice on structure and GST
Unit-economics variance	Cost-to-serve may exceed plan early on	Staged pricing, pilot data before expansion, scenario-based planning
Supply onboarding	Informal vendors may resist structure	Simple onboarding, partner-first benefits, early partner advisory group

14. The Road Ahead

From wedding orchestration to a celebration ecosystem.

PHASE	FOCUS	OUTCOMES
Phase 1: Prove the model	Brand website (built); partner and family onboarding; pilot weddings in one launch city	Validated pricing, cost-to-serve and playbooks
Phase 2: Systemise	Partner portal, coordination console, agreements and payments; larger partner network	Repeatable delivery and measurable partner quality
Phase 3: Expand	Additional cities; destination weddings; guest-experience tools	Geographic density; diaspora and destination demand
Phase 4: Extend	Honeymoon and travel, gifting, hospitality programmes, anniversaries, private events	Higher lifetime value; recurring family relationships

Timing for each phase will be set once funding, launch city and partner traction are confirmed.

— Possibilities Beyond the Wedding

Where We Begin

- Wedding planning
- Guest experience

Growing Outward

- Destination travel
- Honeymoon planning
- Couple experiences

Further Out

- Family celebrations
- Anniversaries
- Private events
- Hospitality
- Travel partnerships

Platform Options

- Software tools for partners
- White-label programmes for hotels and venues
- Event insurance and financing referrals
- Market insight products from aggregated data

INVESTOR INSIGHT

Weddings are the entry point to a family relationship that runs for decades: travel, milestones, anniversaries, and the next generation's celebrations. Today a wedding; tomorrow an entire celebration ecosystem.

15. Why Invest in BRIDLYA?

Five reasons to back the orchestration layer.

— Five Reasons to Invest

1. A Very Large, Fragmented Market

Ten million-plus weddings a year and a market valued by published estimates at ₹4.25–6.5 lakh crore, of which only a small share is organised.

2. A Differentiated Position

Not a directory and not a boutique planner: an orchestration layer combining discovery, curation, planning, booking, coordination, hospitality, logistics, execution and support.

3. A Brand Built to Premium Standards

A distinctive identity and a production-quality digital experience already exist, supporting trust and premium positioning from launch.

4. Multiple Revenue Streams

Commissions and coordination fees, partner subscriptions, attach services and enterprise programmes, on top of a single customer relationship.

5. A Platform That Compounds

Every wedding strengthens the partner network, operating playbooks and data, and opens adjacent opportunities in travel, gifting and family celebrations.

INVESTOR INSIGHT

The base case reaches about ₹95 cr of annual revenue in Year 5 on roughly 2.7% of the serviceable market, a position that is ambitious but not market-dominating. The upside case reflects what is possible if brand, supply density and operations compound.

— Proposed Use of Funds (Indicative Allocation)

AREA	SHARE	PURPOSE
Product & technology	30%	Partner and family platforms, coordination console, payments integration
Operations & wedding-management team	25%	Wedding managers, concierge, on-ground support, pilot weddings
Partner acquisition & verification	15%	Onboarding, verification, partner success
Brand & marketing	15%	Content, partnerships, launch-city activation
Legal, compliance & insurance	7%	Agreements, payments structure, liability cover
Working capital reserve	8%	Seasonality and contingency

The raise amount, instrument and runway are to be determined by the founding team and discussed with investors. Allocation percentages are indicative.

BRIDLYA

Where Forever Begins.

Every detail, beautifully brought together.

Building India's orchestration layer for weddings and celebrations.

Next steps. Founding team profiles, launch-city selection, funding terms and primary market research to be added by the BRIDLYA team before circulation.

Appendix A. Assumptions, Sources & Disclaimer

Everything here is editable. The financial model is a conversation tool, not a forecast.

— Scenario Inputs

SCENARIO	WEDDINGS, YR 1–5	AVG SPEND	TAKE RATE	OTHER SERVICES	PARTNERS (SUBSCRIBERS), YR 1–5	SUBSCRIPTION / PARTNER / YR
Conservative	10, 60, 200, 500, 1,000	₹20 lakh	6%	0.5%	10, 50, 175, 400, 750	₹24,000
Base	20, 150, 600, 1,800, 4,000	₹25 lakh	8%	1.0%	20, 100, 350, 800, 1,500	₹36,000
Ambitious	30, 300, 1,500, 5,000, 12,000	₹30 lakh	10%	1.5%	40, 200, 700, 1,600, 3,000	₹48,000

— Other Assumptions

- Serviceable market: 150,000 weddings a year ($\approx 1.5\%$ of 10 million) at ₹25 lakh average spend, an assumption pending primary research.
- Cost to serve $\approx 3.5\%$ of GMV; acquisition cost ₹40,000 per wedding (base case).
- GMV is the value of services coordinated through BRIDLYA; it is *not* BRIDLYA revenue. Revenue is the sum of coordination fees and commissions, subscriptions and other services.
- 1 crore = 10 million; 1 lakh = 100,000. Years are operating years from launch.
- No revenue has been earned to date. No customers, partners or vendors are onboarded.

— Sources for Market Data
